Vault360Ai

Why us Services For VCs Pricing **Book a call**

FRACTIONAL CISO · SECURE-BY-DESIGN · INVESTOR DILIGENCE

Security that closes deals, not slows them down.

Vault360Ai helps startups pass enterprise security reviews, earn SOC 2 and HITRUST, and survive investor diligence. We also vet startups for the VCs who back them.

Holdback negotiated after M&A diligence found an exposed key

Why not just use what AWS or GCP offers?

Cloud provider programs are useful for credits and best-practice reviews. They aren't built to get you through a buyer's security review or an investor's diligence.

	Cloud provider startup programs	Vault360Ai
Independence	Designed around their own platform	Vendor-neutral across AWS, Azure and GCP
Goal	Well-architected cloud use	A signed audit report, a closed deal or a passed diligence
Who you work with	Account teams and partners	A named senior security leader, hands-on
Investor lens	Not their role	We run diligence for VCs, so we know what they look for
AI and LLM risk	General guidance	Threat modeling, prompt injection, tenant isolation, AI red teaming
Pricing	Credits that lock in spend	Fixed-price bundles with clear deliverables

Everything from architecture to audit

One partner for the security work that holds back revenue and funding.

Secure-by-design architecture

Threat modeling, AWS/Azure/GCP landing zones, IAM, secrets, logging and Zero Trust built into the product from day one.

Compliance and certifications

SOC 2, ISO 27001, HIPAA, HITRUST and PCI. We build the controls, automate the evidence and manage the auditor.

Fractional CISO

Board-ready risk reporting, security roadmap, incident response, vendor risk and customer security reviews, without a full-time executive hire.

AI and LLM security

OWASP LLM Top 10 controls, prompt injection guardrails, training-data isolation, AI red teaming and a customer trust center.

Cloud red team and pen testing

Attack-path mapping for identities, Kubernetes and CI/CD, so you see how far an attacker could actually go.

M&A and diligence

Rapid cyber diligence, dark web checks, remediation costing for the purchase agreement, and day 1 to 100 integration plans.

How we work

How we work

Fast, fixed-scope and focused on the outcome you need.

01

Assess

A two-week review of architecture, code, cloud, identity and compliance gaps.

02

Fix

Prioritized remediation, hands-on where it helps and guided where your team can own it.

03

Prove

Audit reports, trust center and evidence packs that buyers and investors accept.

04

Stay ready

Fractional CISO support so you don't slip as you grow.

Built for founders and the investors who back them

Breaches destroy startups. Both sides want to know the real security posture before money moves.

For startups

- Pass enterprise security questionnaires faster
- Get SOC 2, HITRUST or ISO ready on a deadline
- Walk into diligence with a clean report and a roadmap
- Get security leadership without a $300k hire

For VCs and acquirers

- 10-day technical and security diligence per company
- Red, yellow or green rating across five pillars
- Confidential board-ready memo and 90-day roadmap with costs
- Post-investment support for your portfolio

Four ways to work together

Fixed scope and clear price ranges. Final quotes depend on company size and stack.

STARTUPS

Launchpad Review

$4.5k–$7.5k

2 weeks, one-time

- Security and architecture review
- Cloud, identity and code risk findings
- Prioritized 30-60-90 day plan
- Founder readout

SERIES A AND UP

Compliance Sprint

$15k–$30k

8–16 weeks

- SOC 2, ISO 27001, HIPAA or HITRUST readiness
- Policies, controls and evidence automation
- Auditor selection and management
- Customer trust center

Get certified

GROWING TEAMS

Fractional CISO

$4k–$9k / mo

3-month minimum

VCS AND ACQUIRERS

Investor Diligence

$6k–$15k

per company, 10 days

- Security leadership and roadmap
- Board and investor reporting
- Incident response and vendor risk
- AI and product security guidance

Add a CISO

- Five-pillar risk scoring
- Red, yellow, green rating
- Confidential board-ready memo
- 90-day roadmap with costs

Vet a company

Bundles can be combined. Ask about portfolio pricing for VCs and discounts for early-stage founders.

Led by a practitioner, not a pitch deck

Vault360Ai is led by Vidya A Shyamala, a security engineering leader with 20+ years across Amazon, HPE, East West Bank and SAP. She has built security programs through acquisitions and regulated banking, run cloud red teams across hundreds of accounts, and advised CEOs, CISOs and boards.

You work directly with her, from the first review to the audit report.
